Dumbbell Bulgarian Split Squat

Intermediate

- Find a box or bench that is roughly knee height or a few inches lower. (The lower the box is the lower the mobility requirement).
- You can either place your toes or the top of your foot on the box. Point your front foot forward or slightly turned outwards and break at the knees and hips simultaneously.
- Aim to get your front leg to hit parallel depth (hamstring parallel with the ground) or lower.
- The further forward your front foot is, the longer the Range of Motion is at your hips. The further back your front foot is, the longer the ROM at your knees.

# Crunches

- Lay flat on your back with your knees bent and your feet flat on the ground, about a foot from your lower back.
- Place your fingertips on your temples with your palms facing out.
- Draw your belly into the base of your spine to engage the muscles, then raise your head and shoulders off the floor. Return to starting position and repeat.

# Hand Plank

**Novice**

- Start in a kneeling position with your hands planted on the ground.
- Pick your knees up off the ground. Hold in this position with a flat back.
